

Assignment-5

Objective: Loop control structure (while, do-while, for) with jump statements

1. Find the series of no.s between 1000 to 10,000 which satisfies the following conditions.
i.e. If no is ijkl & $i + j + k = l$ then print the no else omit the no .
Ex : No is 1236 & $1+2+3=6$
2. WAP to print numbers between 10 to 1000 where the digits of the numbers are equal. (e.g. 22, 33, 111, 555 or 999)

3. Implement following structure:

A			
A	B		
A	B	C	
A	B	C	D

4. Implement following structure:

1	2	3	4	3	2	1
	1	2	3	2	1	
		1	2	1
